

I just wanted to drop you a letter and ask you to support satellite radio and oppose HR 4026. XM radio has made it easier for me to travel and conduct business. The traffic and weather channels make it easy for me to drive through large cities when I go there for business or just to visit family. I always found it hard to get good weather and traffic news from the local stations in Dallas and XM radio offers a great alternative. Several of the towns I go to don't even offer weather or traffic through their local stations. If there is a tornado warning or bad weather I used to have a hard time finding out until I was back home and would hear about it on TV. I'd like to ask you to oppose HR 4026 so that XM radio can continue to provide this necessary service.
